WELDING
SOCIETY

JANUARY 1933
Vol. 12 No. 1

INDEX TO VOLUME 11

1932

Published by the
AMERICAN WELDING SOCIETY, 33 WEST 39TH STREET
NEW YORK, N. Y.

INDEX TO SUBJECTS

Aircraft Welding—Spot Welding of Stainless Steel as Applied to Aircraft—Carl DeGanahl, April, pp. 60–62. Discussion, July, p. 11.

Arc, Metal Deposition in—Gilbert E. Doan and J. Murray Weed, Sept., pp. 31–33.

Arc Welding, Researches in—Gilbert E. Doan and J. L. Myer, Nov., pp. 26–28.

Automatic Welding with Heavily Coated Electrodes—Laurence R. Leveen, Nov., pp. 29–30.

Automobile Repair Welding—A. F. Keogh, Nov., pp. 5–7.

Automobile Welding—Application of the Oxy-Acetylene Process in the Production of Motor Cars—R. E. Esch, Jan., pp. 23–25.

Automotive Industry, Developments in—Jan., p. 6.

Bomb Bodies Withstand Impact Tests—March, p. 26.

Bridge Becomes Old, When a—L. R. Canfield, Feb., pp. 29–30.

Bridge Welding—Largest Welded Steel Bridge—Jan., pp. 27–28.

Bridges—Altering Wrought Iron and Steel Bridges by Welding—Frank P. McKibben, March, pp. 21–25.

Bronze Welding, Principles of—A. R. Lytle, Dec., pp. 14–17.

Chemistry of Low-Carbon Metal Arc Welds—J. C. Hodge, Oct., pp. 36–40.

Consumer's Acceptance—T. C. Fetherston, Nov., pp. 16–17.

Copper Welding—Oxy-Acetylene Welding in the Repair of Copper Fire Boxes of Locomotive Boilers, The Use of—L. Saccomani and R. Verzillo, Jan., pp. 28–30.

Copper Welding—Constructing a 500-Gallon Welded Everdur Tank—C. B. Jacobs, Jr., March, pp. 17–18.

Corrosion Resisting Steels—C. A. Scharschu, Nov., pp. 34–36.

Corrosion Resisting Steels—Allegheny Metal in Dairy Equipment—L. W. Hostettler, Jan., pp. 25–26.

Corrosion Resisting Steels—Cause and Cure of Intergranular Corrosion in Austenitic Steels—John A. Mathews, April, pp. 23–27. Discussion, July, pp. 9–11.

Corrosion Resisting Steels—Spot Welding of Stainless Steel as Applied to Aircraft—Carl DeGanahl, April, pp. 60–62. Discussion, July, p. 11.

Corrosion Resisting Steels and Irons—J. H. Critchett, Nov., pp. 32–34.

Corrosion Resisting Steels in Architectural Industry—D. T. Haddock, Nov., pp. 37–39.

Current—Influence of Current in Arc-Welding Soft Steel, Abstract of Paper on the—F. Lefring, Feb., pp. 7–8.

Cutting, Some Methods and Effects of Machine Gas—L. M. Curtiss, Jan., pp. 19–22.

Ductility: A Measure of Cleanliness—E. Chapman, May, pp. 29–32.

Ductility and Penetration—Two Fallacies—C. J. Holslag, April, pp. 47–48.

Ductility—Discussion of C. H. Jennings' Paper—J. C. Lincoln, July, pp. 28–29.

Ductility in Arc Welds with Some Reference to Strength Values—Chas. H. Jennings, April, pp. 37–42.

Ductility in Metal Structures—C. A. Adams, April, pp. 46–47.

Ductility on Security in Welded Connections—Methods of Its Measurement, The Effect of—D. Rosenthal, May, pp. 5–9.

Ductility Requirements for Welded Pressure Piping, Weld—T. W. Greene, April, pp. 55–59.

Ductility: What Is Its Significance? How Test for It?—H. F. Moore, April, pp. 35–36.

Ductility—Written Discussion: Symposium on—May, pp. 24–32.

Elevated Temperature Tests of Arc Welds in Russia—B. M. Shimkin, Nov., p. 31.

Engineering and Economic Study of Electric Arc Welding—C. L. Waddell, April, pp. 52–54.

Extruded Bronze, Welding of—Ira T. Hook, April, pp. 42–46. Discussion, July, pp. 12–13.

Fatigue—Corrosion Study of Welded Low-Carbon Steel—Wilber E. Harvey and F. Jerome Whitney, Oct., pp. 12–19.

Fatigue of Welds—Giving the Weld a Chance—G. E. Thornton, Feb., pp. 9–10.

Fatigue of Welds—Discussion of Paper by G. E. Thornton, Entitled, "Giving the Weld a Chance"—Chas. H. Jennings, June, pp. 10–11.

Gas Cutting—Flame Cutting of Low-Carbon Steel—J. R. Dawson, June, pp. 5–6.

Gas Cutting, Methods and Effects of Machine—L. M. Curtiss, Jan., pp. 19–22.

High Carbon Steel, Welding—P. P. Alexander and C. H. Jennings, Feb., p. 8.

Houses, Welded—A. M. Candy, Dec., pp. 9–11.

Inspection and Tests of Welding in Structures—F. Eder, June, pp. 11–15.

Lead Burning or Welding—R. L. Ziegfeld, Sept., pp. 33–37.

Machine Welding—Problems in Design and Operations—J. L. Anderson, June, pp. 7–9. Discussion, July, pp. 13–15.

Machinery Construction—Welded Rolled Steel Design for the Iron and Steel Industry—Christian A. Wills, Sept., pp. 8–13. Discussion by R. A. Bull, Dec., pp. 31–32. Rebuttal of Mr. Bull's discussion by Christian A. Wills, Dec., p. 33.

Magnetic Field Parallel to the Iron Arc on Welding, Influence of—F. R. Hensel and W. A. Maddox, Oct., pp. 5–9.

Metal Spraying—H. B. Rice, Sept., pp. 26–30.

Metallurgy of Welds—J. C. Holmberg, Sept., pp. 23–26.

Metals, Welding of, Recent Developments—Jan., pp. 7–8.

New Process for Making Welded Joints—H. S. George, July, pp. 22–28.

Nickel Alloys—Gas Welded and Brazed Joints for High Nickel Alloys—F. G. Flocke, J. G. Schoener and R. J. McKay, March, pp. 12–16.

Nickel Alloys, Welding of—J. G. Schoener and F. G. Flocke, Nov., pp. 18–22.

Oxyacetylene Process, Advance in—J. H. Critchett, Dec., pp. 8–9.

Pipe Line Welding, Developments in—Jan., pp. 5–6.

Pipe Welding—All-Electric Arc-Welded Steel Penstock—Clayton M. Allen, Nov., pp. 22–25.

Pipe Welding for a High Pressure Steam Power Plant—E. B. Severs and W. P. Gavit, May, pp. 10–12. Discussion, July, pp. 15–16.

Pipe Welding, New Aspects in—Willard P. Curley, April, pp. 33–35.

Pipe, Welding of—S. Lewis Land, March, p. 11.

Piping—Specifications for Welded Piping for High Temperature and High Pressure Steam Service—F. W. Martin, Feb., pp. 24–27.

Piping—Weld Ductility Requirements for Welded Pressure Piping—T. W. Greene, April, pp. 55–59.

Plumbing, Heating and Steam Fitting, Developments in—Jan., p. 7.

Pressure Vessels and Boilers, Developments in—Jan., pp. 5–6.

Pressure Vessels, Application of Welding to—P. R. Hawthorne, Sept., pp. 19–23.

Pressure Vessels—Ductility of Welds Is Important in Welded Pressure Vessels, Why—E. R. Fish, April, pp. 32–33.

Pressure Vessels—Effect of the New Welding Code on Process Industry and the Importance of Its Proper Application—F. G. Sherbondy, Feb., pp. 28–29.

Pressure Vessels—The Metallurgy of Welds—J. C. Holmberg, Sept., pp. 23–26.

Pressure Vessels—Practical Application of the A. S. M. E. Welding Code—A. J. Moses, Feb., pp. 13–15.

Pressure Welding of Low-Carbon Steels with Theoretical Consideration on the Mechanism of Such Welding—C. R. Austin and W. S. Jeffries, Part 1, June, pp. 24–33. Continued, Part 2, July, pp. 30–37.

Production Welding—Abstract of Paper on Oxyacetylene Welding in Production—H. O. T. Ridlon, July, pp. 18–20.

Production Welding—Electrolux Refrigeration, Welding as Applied to the—W. R. Campbell & R. S. Taylor, April, pp. 48–52. Discussion, July, pp. 11–12.

Production Welding—Largest Warm Air Furnace in the World, The—A. F. Davis, March, p. 30.

Production Welding—Savings Effected by Arc Welding Gas Pressure Regulators—A. F. Davis, July, p. 29.

Production Welding—Sign of Progressive Manufacturing—I. C. Jones, Feb., p. 27.

Railroad—Bronze Welding in Locomotive Maintenance and Repair—W. S. Farr, Nov., pp. 11–13.

Railroad—Building Up and Heat Treating Rail Ends—Walter Constance, Dec., p. 13.

Railroad—Oxyacetylene Cutting as Applied to Railroad Car and Locomotive Scrapping—W. H. Ludington, Oct., pp. 34–36.

Railroad Welding, Developments in—Jan., p. 7.

Railroad Welding—Gas Welding on Nickel Plate Road, Application of—J. C. Miller, Jan., pp. 32–34.

Railroad Welding—Oxy-Acetylene Welding in the Repair of Copper Fire Boxes of Locomotives and Boilers—L. Saccomani and R. Verzillo, Jan., pp. 28–30.

Railroad Welding—Welding and Heat-Treating Alloy Steel Locomotive Frames—W. A. Newman and C. F. Pascoe, May, pp. 32–33.

Research—Concerning Crater Formation—Gilbert E. Doan, July, pp. 17–18.

Research—A Corrosion-Fatigue Study of Welded Low-Carbon Steel—Wilber E. Harvey and F. Jerome Whitney, Oct., pp. 12–19.

Research—Distribution of Stresses in Welded Double Butt Strap Joints—S. C. Hollister & A. S. Gelman, Oct., pp. 24–31.

Research—Fundamental Research Problems in Welding—Feb., pp. 5–7.

Research—Fundamental Research Problems in Welding—Dec., pp. 18–26.

Research—Metal Deposition in Electric Arc Welding—Gilbert E. Doan and J. Murray Weed, Sept., pp. 31–33.

East Engin.

Research—Study of the Transformation Points of Fusion Weld Metal—F. R. Hensel and E. I. Larsen, April, pp. 28–32. Discussion, July, pp. 8–9.
Research—Tests of Joints in Wide Plates—Wilbur M. Wilson, James Mather & Charles O. Harris, Dec., pp. 27–31.
Research—The Strength of Arc Welded Joints—Frank Richard Freeman, June, pp. 16–24.
Researches in Arc Welding—Gilbert E. Doan and A. L. Myer, Nov., pp. 26–28.
Resistance Welding, Thyratron Control for—Warren C. Hutchins, Oct., pp. 19–23.
Review Outstanding Welding Developments in 1931—Jan., pp. 5–9.
Rules for Fusion Welded Construction of Boilers and Pressure Vessels—Jan., pp. 9–18.
Shipbuilding—Barge Construction at Federal Shipbuilding and Dry Dock Company, Welded—Gordon G. Holbrook, April, pp. 5–8.
Shipbuilding—Design and Construction of an Arc Welded Naval Auxiliary Vessel—Homer N. Wallin and Henry A. Schade, Dec., pp. 5–7.
Shipbuilding—Discussion of Papers at Annual Meeting—July, pp. 5–8.
Shipbuilding—Welding on U.S.S. *New Orleans*—J. O. Gawne, April, pp. 9–23.
Spot and Relief or Projection Welders and Their Application to Production Problems, Modern—P. W. Fassler, May, pp. 12–15.
Spot Welding of Stainless Steel as Applied to Aircraft—Carl De Ganahl, April, pp. 60–62. Discussion, July, p. 11.
Steel Castings in Welded Structures, The Use of—J. G. Ritter, March, pp. 27–29.
Steel Structures in Germany, The Welding of—Werner Boos, Feb., pp. 20–23.
Steel, Weldability of—Reply to the Discussion on Paper by Wilmer E. Stine on "Factors Affecting the Weldability of Steel"—W. E. Stine, March, pp. 18–20. Comments on Reply by W. E. Stine to the Discussion of His Paper on "Factors Affecting the "Weldability of Steel"—F. T. Llewellyn, March, p. 20.
Strength of Arc Welded Joints—Frank Richard Freeman, June, pp. 16–24.
Structural Welding—Altering Wrought Iron and Steel Bridges by Welding—Frank P. McKibben, March, pp. 21–25.
Structural Welding—Arc Welding Helps Save $1,000,000 on Boston Tunnel—A. F. Davis, June, pp. 15–16.
Structural Welding—Experimental Determination of the Values of Fillet Welds in Tension—Leon C. Bibber, May, pp. 16–19.
Structural Welding—Firmer Foundations, For—March, p. 26.
Structural Welding—Inspection and Testing of Welding in Structures—F. Eder, June, pp. 11–15.
Structural Welding—Largest Welded Steel Bridge—Jan., pp. 27–28.
Structural Welding—Load Test on Welded Roof Truss—Chas. H. Jennings, Sept., pp. 13–18. Discussion by Frank P. McKibben, Dec., pp. 11–13.
Structural Welding—New Type of Steel Floor—Joseph G. Shryock, Feb., pp. 11–12.
Structural Welding—Pediatric Building for the Boston City Hospital, Shop and Field Welded—J. T. Whitney, July, p. 20–22.
Structural Welding—Rules and Regulations for Electrically Welded Steel Constructions in Germany—P. V. Jankov, March, pp. 29–30.
Structural Welding—Use of Welding in Plate Fabrication—T. F. Bright, March, pp. 5–10.
Structural Welding—Variation in Battledeck Floor Construction—A. F. Davis, Jan., pp. 31–32.
Structural Welding—Welded Joints for Seismic Stresses in a Tall Building—H. H. Tracy, Nov., pp. 14–16.
Structural Welding—When a Bridge Becomes Old—L. R. Canfield, Feb., pp. 29–30.
Structural Welding and Cutting, Developments in—Jan., p. 5.
Tanks—Use of Welding in Plate Fabrication—T. F. Bright, March, pp. 5–10.
Tank Welding—Code for the Welded Construction of Low Pressure Tankage—Jan., pp. 35–38.
Tank Welding—Construction of a 500-Gallon Welded Everdur Tank—C. B. Jacobs, Jr., March, pp. 17–18.
Torches—Keel Multi-Flame Blowpipe, The New—F. C. Keel, Feb., pp. 16–19.
Unfired Pressure Vessel Code—March, p. 30.
Welders—Prequalification Tests for—Ernest Lunn, Oct., pp. 10–12. Discussion of Ernest Lunn's Paper—H. E. Rockefeller, Nov., pp. 8–11.
Welders—Qualifications for—Vincent P. Marran, Oct., pp. 31–34.
Welding and Cutting Apparatus, Developments in—Jan., p. 8.
Welding School Graduate—Committee Report—Nov., pp. 39–40.
Wrought Iron, The Welding of—James Aston, May, pp. 19–24.
X-Ray Determination of Stresses in Welds—John T. Norton, Sept., pp. 5–7. Discussion of J. T. Norton's Paper—R. E. Kinkead, Nov., pp. 28–29.
Year Book—August Issue—Activities, Committees, Members, Sustaining Members.

INDEX TO AUTHORS

ADAMS, C. A.—Ductility in Metal Structures, April, pp. 46–47.
ALEXANDER, P. P.—Welding High Carbon Steel, Feb., p. 8.
ALLEN, CLAYTON M.—All-Electrical Arc-Welded Steel Penstock, Nov., pp. 22–25.
AMERICAN BUREAU OF WELDING—Fundamental Research Problems in Welding—Compiled by Fundamental Research Committee, Feb., pp. 5–7.
Giving the Weld a Chance—G. E. Thornton, Feb., pp. 9–10.
Concerning Crater Formation—Gilbert E. Doan, July, pp. 17–18.
On the X-Ray Determination of Stresses in Welds—John T. Norton, Sept., pp. 5–7.
Metal Deposition in Electric Arc Welding—Gilbert E. Doan and J. Murray Weed, Sept., pp. 31–33.
A Corrosion-Fatigue Study of Welded Low-Carbon Steel—Wilber E. Harvey and F. Jerome Whitney, Oct., pp. 12–19.
Distribution of Stresses in Welded Double Butt Strap Joints—S. C. Hollister & A. S. Gelman, Oct., pp. 24–31.
Researches in Arc Welding—Gilbert E. Doan and J. L. Myer, Nov., pp. 26–28.
Fundamental Research Problems in Welding—Compiled by Fundamental Research Committee, Dec., pp. 18–26.
AMERICAN WELDING SOCIETY—Outstanding Welding Developments in 1931—Jan., pp. 5–9.
Rules for Fusion Welded Construction of Boilers and Pressure Vessels—Jan., pp. 9–18.
Code for the Welded Construction of Low Pressure Tankage—Submitted by the Building Code Committee—Jan., pp. 35–38.
Committee Report—What Should Be Known by Welding School Graduate—Nov., pp. 39–40.
Year Book—August Issue—Activities, Committees, Members, Sustaining Members.
ANDERSON, J. L.—Machine Welding—Problems in Design and Operations, June, pp. 7–9.
ASTON, JAMES—The Welding of Wrought Iron, May, pp. 19–24.
AUSTIN, C. R.—Pressure Welding of Low-Carbon Steels with Theoretical Considerations on the Mechanism of Such Welding, Part 1, June, pp. 24–33. Part 2, July, pp. 30–37.
BIBBER, LEON C.—The Experimental Determination of the Values of Fillet Welds in Tension, May, pp. 16–19.
BOOS, WERNER—The Welding of Steel Structures in Germany, Feb., pp. 20–23.
BRIGHT, T. F.—Use of Welding in Plate Fabrication, March, pp. 5–10.
BULL, R. A.—Discussion of Paper by Christian A. Wills, on "Welded Rolled Steel Design for the Iron and Steel Industry," Dec., pp. 31–32.
CAMPBELL, W. R.—Welding as Applied to the Electrolux Refrigerator, April, pp. 48–52.
CANDY, A. M.—Written Discussion: Symposium on Ductility. Paper by Chas. H. Jennings on "Ductility in Arc Welds with Some Reference to Strength Values," May, p. 24.
Discussion of Chas. H. Jennings' Paper, "Load Test on Welded Roof Truss," Dec., pp. 9–11.
CANFIELD, L. R.—When a Bridge Becomes Old, Feb., pp. 29–30.
CHAPMAN, EVERETT—Ductility: A Measure of Cleanliness, May, pp. 29–32.
CONSTANCE, WALTER—Building Up and Heat Treating Rail Ends, Dec., p. 13.
CRITCHETT, J. H.—General Discussion on Ductility, May, pp. 28–29.
Stainless Steels and Irons, Nov., pp. 32–34.
Recent Advances and Future Expectations of the Oxyacetylene Process, Dec., pp. 8–9.
CURLEY, WILLARD P.—New Aspects in Pipe Welding, April, pp. 33–35.
CURTISS, L. M.—Some Methods and Effects of Machine Gas Cutting, Jan., pp. 19–22.
